

Dual Hand Adjustable Pulley Stand Alone and Wall Mounted

For a wide variety of upper, middle and lower body exercises

FEATURES:

- Compressed air resistance allows high speed movements without the ballistics associated with traditional weight stacks
- Independently adjustable patient stabilization handles on both sides
- Near zero starting resistance with minimal increment changes
- Adjustable height cable column allows performance of numerous bilateral or unilateral patterns
- Fully enclosed mechanisms enhance safety and aesthetics
- Angled carriage arm allows overhead exercises without additional pulleys or booms
- Iliac crest belt facilitates lower extremity exercise
- Six position ankle harness allows specific hip, knee and ankle exercises
- Wheelchair accessible design may qualify for ADA tax credit
- Welded steel frame with aluminum side rails

OPTIONAL digital display counts repetitions, registers heart rate

3100 Stand Alone Pulley
